

Block Cutters
On the cutting edge for customers' satisfaction

ORIT B.V.

User Manual BPTC

Foreword

We congratulate you with your BPTC , this will save you a lot of work.
This manual describes the use and maintenance of the BPTC
It is important to read this manual carefully. For your own and your BPTC benefit.

First of all, several features of a general character:

- Control your BPTC on receipt
- Whenever there is an incomplete delivery, or there are any damages, report directly
- Before usage, read the manual and the safety instructions
- Not applying the instructions means that all guarantees and liabilities will be terminated
- Changes of the product will give no liabilities to previous delivered products
- Whenever using not original spare parts, the guarantee will be terminated

ORIT strives for a customers' satisfaction.

Whenever there are improvements according to your opinion, we sincerely like to hear from you.
Every customer who gives suggestions will receive a small gift.

We wish you a lot of satisfaction with your BPTC.

1. Introduction

The ORIT BPTC is a trolley, designed for brick transport,

ORIT B.V. could accept no responsibilities by incorrect or incompetent usage of the BPTC.

2. Technical specifications

Carrying weight	: 450 Kg.
Gripping range	: 530-920 / 1250 MM
Dead weight	: 65 Kg.

3. Safety instructions

The following safety instructions should be followed for a safe use for trolley and operator.

- Minors under the age of 16 are not allowed to operate the trolley.
- The usage of protective goggles while operating the trolley is obligated.
- It is strictly forbidden to touch any moving parts while handling the trolley.
- You are allowed to operate the trolley, with your face facing the trolley and both hands holding the handles. This to prevent any accidents.
- Never place any body parts etc. underneath the trolley while lifting.
- The product may be lifted when the product is dry, clean and covers the whole width of the trolley.

4. Maintenance

Always use tools that fit perfectly during maintenance, this will avoid damages.

The trolley should be maintained according the next directions to provide a long lifetime with less disturbances.

Daily maintenance

- Clean the trolley after every working day and check for defects.

Damaged parts should be without regard the maintenance term replaced immediately for original spare parts. Whenever using not original spare parts, the guarantee will be terminated.

65 Guarantees offered

ORIT provides 5 years of guarantee on all parts. Excluded wearing parts like rubbers and Widia tips.

This guarantee accords only for use by normal conditions, and when this manual is followed carefully.

This trolley is controlled on material and faults by manufacturing. Your invoice is also your guarantee certificate and should be considered when demanding your guarantee. The machine number should be mentioned. Complaints within the period of guarantee should be mentioned at your ORIT-dealer.

During the period of guarantee, ORIT repairs free of charge when:

- The trolley is used correct and for the right purposes.
- Repairs are performed competent by qualified personnel of your ORIT-dealer
- The invoice is considered with the mentioned machine number

Parts that offer normal wear are not covered.

Service

After the period of guarantee, your product will be repaired with care. Repairs are only accomplished when the product is sent by reimbursement.

For service and/or repairs outside the period of guarantee could be reported directly at ORIT B.V. in Tilburg
